DEAR MS. LAST NAME:

Welcome to the Alberta Breast Cancer Screening Program (ABCSP)

The ABCSP is coordinated by Alberta Health Services in partnership with the Alberta Society of Radiologists. The ABCSP aims to find breast cancer early. Regular screening with mammography is the best way to find breast cancer early, when treatment works the best. Because you're 50 to 74 years of age, you've been included in this important program.

If you haven't had a mammogram in the last 2 years, please consider making an appointment.

Where can I have my FREE screening mammogram?

To find a clinic near you, call **1-866-727-3926** or visit our website at **screeningforlife.ca** and click on "Breast Cancer Screening" then "How to Book a Mammogram".

Mammography alone doesn't find all breast cancer. That's why it's important to:

- know what looks and feels normal for you so you will notice any changes in your breasts
- see your doctor right away if you notice anything unusual (*the enclosed brochure has more information*)

Your screening mammogram is free-of-charge.

Alberta women aged 50-74 do not need a doctor's referral to book a mammogram.

To learn more about the ABCSP and about how we protect your privacy, **please see the reverse**. Please read the enclosed brochure to learn about the benefits and risks of screening mammograms. You can also visit our website at screeningforlife.ca or call 1-866-727-3926 for more information.

Sincerely,

Dr. Huiming Yang
Medical Director, Screening
Alberta Health Services
