

# Lung cancer screening can save your life

Getting screened can lower your risk of dying from lung cancer by approximately 25%.

Call the Alberta Lung Cancer Screening Program at 1-866-727-3926 or talk to your primary care provider to see if you're eligible for screening.

You are 50 to 74 years old

You currently smoke cigarettes

or

You previously smoked cigarettes

Screening works by finding cancer early, before you have symptoms, when it is easier to treat or cure. Visit [screeningforlife.ca/lung](https://screeningforlife.ca/lung) or scan the QR code for more information about lung cancer screening, or to complete a risk assessment.
