

INSIGHT-SCREEN: INforming cancer Screening Improvement through engagement with General population, Healthcare providers, and partners, Together

Healthcare Providers: Help Strengthen Cancer Screening in Alberta

Background

Cancer screening rates in Alberta remain below Alberta and Canada targets:

• Breast: 62.9% • Cervical: 62.4% • Colorectal (CRC): 43.1%

Cancer Prevention and Screening Innovation in Primary Care Alberta is conducting interviews to understand barriers and facilitators to breast, cervical, and colorectal cancer screening uptake.

Get Involved

- ✓ Are you a provider or clinical staff involved in patients' breast, cervical, and or colorectal cancer screening?
- ✓ Could you help us identify strategies at the patient, provider and/ or health system level that improves breast, cervical, and colorectal cancer screening uptake?

What will I be doing?

- Share your perspectives on the barriers and facilitators of cancer screening and help identify potential strategies to enhance screening uptake for Albertans.

What is the time commitment?

- 45-60 minute phone interview

Why participate?

- Your insights will help us improve access to cancer screening, inform better resources and care pathways, and support more Albertans in completing recommended breast, cervical, and colorectal cancer screening.

Interested in participating?
